III-SEM,/ETC/AE&IE/CSE/IT/MECHATRONICS/ ELECTRICAL(INST & CTRL/ECE/ 2021(W) **TH-III Digital Electronics**

Answer any five Questions including Q No.1& 2

Time- 3 Hrs

Full Marks: 80

Figures in the right hand margin indicates marks 1. Answer All questions 2 x 10 State De-Morgan's theorems. a. Convert (10110101)₂ from binary to grey code. b. Find out the number of input lines, output lines and select lines in: (i)1:8 De-Mux (ii)16:1 Mux Write down the truth table of half subtractor. d. Define race-around condition in flip flop and suggest a method to overcome it. e. f. Difference between combination and sequential logic circuit.(any 4) Mention the type of flip flops used in : (i)Ripple Counter (ii)Shift Register g. Write the excitation table of D-flip flop. h. List down different types of: (i) Analog to Digital Convertors, (ii) Digital to i. **Analog Convertors** Define Fan In and Fan Out. į. 2. Answer **Any Six** Questions 6 x 5 Simplify the below given expression using Karnaugh's map and draw the logic a. circuit using logic gates. $F(a, b, c, d) = \sum m(0.2, 3.4, 7.9, 10.11, 15) + d(1.6.8)$ Explain the function of 4: 1 MUX with neat diagram and truth table. b. Design the operation of full adder with the help of truth table and circuit diagram. c. Design a JK flip flop using a RS flip flop. d. With neat circuit diagram, Explain the working of R-2R ladder type DAC. e. Write any 5 differences between SRAM and DRAM. f. Draw CMOS logic circuit of NAND and NOR gates. g Realize all the logic gates (NOT, AND, OR, NAND, NOR, XOR, XNOR) using 3 10 NAND gates only. Design a 2-bit magnitude comparator using logic gates. 10 4 5 Sketch the logic diagram of clocked JK Flip - Flop. Explain its working with 10 functional table. Explain briefly SISO, SIPO, PISO and PIPO shift register. 6 10 7 Design a mod-6 synchronous up counter. 10 1
